<How to use HelloDevice Manager V2>

May 15, 2015 Technical Support Team BS Park

- 1. Connect the Sena device to network hub with the provided Ethernet Cable(Straight Type), and then provide the power on the device.
- 2. Download the 'HelloDevice Manager V2' program from the below page and install it.

http://www.senanetworks.com/download/software/setup_hdmgr-v2.0.5.exe

- 3. Execute the installed 'HelloDevice Manager V2' program.
- 4. To probe Sena products on your network, execute the [Search]-[Probe]. (via UDP port#2002). If the PC is under firewall, please set the firewall to Disable.

5. Select devices you want to search, and then push the [Add] button. After that, push the [Close] button.

Probe		
2 devices probe	d successfully :	
Device	IP	Mac
PS110	192, 168, 161, 5	00:01:95:0c:49:e5
PS410	192, 168, 10, 250) 00:01:95:05:a9:fe
Start	Add	Close

6. Select a device you want to change settings on the Device List. Insert a ID and Password ('root/root' or 'admin/admin'), and then push the [OK] button.
